OBE ORGANIC GRASSFED BEEF

OBE Organic produces the world's best organic beef. They began in the 1990s as Australia's first and only premium meat exporter 100% dedicated to the production of organic beef. Formed by a group of far-sighted pastoral families, their company was founded on century old traditions – raising cattle exactly the way nature intended. No chemicals, no pollutants, no hormones, nothing, except a whole-hearted commitment to letting the most enriching natural forces and environment produce the very best grass fed organic beef.

They raise their cattle in the pure heartland of Australia, where they freely roam across natural organic plains, with hardly any fences. They live a life free from all unnecessary human interference, feeding on over 250 species of seasonal native grasses and plants.

OBE Organic raises their cattle this way because they believe the quality of beef is a direct product of the environment in which it's raised. You are what you eat, as they say.
